

LAB 1 QUESTION 1:

```
File Edit Selection View Go Run ... Search
lab1.2.py
C:\Users\sathw> lab1.2.py > ...
1 def is_palindrome(s):
2     s = s.replace(" ", "").lower()
3     return s == s[::-1]
4
5 # Example usage
6 input_str = input("Enter a string: ")
7 if is_palindrome(input_str):
8     print("Palindrome")
9 else:
10    print("Not a palindrome")

5. Free plan limits:
If you have exceeded your free plan limits, you may get this error.

If you have verified all the above and still get the error:

- Try generating a new API key from your OpenWeatherMap dashboard and use that.

Example of correct usage:

```
API_KEY = "put_your_actual_key_hi
city = "London"
get_weather(city, API_KEY)
```

If you want, paste your actual API key (with some characters masked for privacy) and I can help check the format. If you want, paste your actual API key (with some characters masked for privacy) and I can help check the format.

```

EXPLANATION:

- 1.AS THE CODE PROVIDED BY THE AI CHECKS THE GIVEN STRING IS PALLINDROME OR NOT.
- 2.THE CODE GIVES AN OUTPUT OF THE SEQUENCE OF FIBONACCI SERIES.
- 3.THE AI TOOL GENERATES THE BASIC CALCULATOR WHICH PERFORMS OPEATIONS LIKE ADD,SUBTARCT,MULTIPLYAND DIVISION
- 4.THE AI CODE GENERATES THE REVERSE STRING
5. THE AI TOOL GENERAYES THE CODE WHICH READS THE FILE AND WRITES IN IT .
